

**TED TODD**  
FINE WOOD FLOORS

# CONTENTS

## WELCOME

We've spent over 25 years designing, making and delivering great wood floors for customers such as yourself.

It's a journey that has seen us grow from a small company reclaiming and restoring old wood floors, taking the lessons learnt from old wood floors and using them to make new ones; to being recognised as industry leaders in the design and innovation of wood flooring – backed up with the service that you've come to expect and depend on. We're pleased to work with partners whose experience and expertise mean that together we deliver what our customers ask for – high quality floors that offer great value for money.

We're still family-owned, still working hard to deliver the best wood floors, still as passionate as ever about what we do. It's our job not just to inspire you but to provide expert help and honest advice, whatever the size and budget of your project.

Robert Walsh, MD & Founder

[www.tedtodd.co.uk](http://www.tedtodd.co.uk)

## PROJECT

Affordable 14mm and 15mm European Oak, with a 3mm and 4mm wear layer.

**Prices from £52.74/m<sup>2</sup> | P8**

## STRADA

Ultra-durable, multi-layer lacquered 20mm European oak with a 6mm wear layer.

**Prices from £94.74/m<sup>2</sup> | P26**

## CLASSIC TONES

Traditional 10mm, 15mm and 20mm engineered construction. Range of tones and finishes with a 3mm, 4mm or 6mm wear layer.

**Prices from £76.74/m<sup>2</sup> | P40**

## WAREHOUSE

15mm & 20mm undulating textures with a 3mm, 4mm or 6mm wear layer.

**Prices from £70.74/m<sup>2</sup> | P14**

## SPECIALIST WOODS

A collection for purists, bringing together different species, all with a smooth texture and 15 - 20mm construction.

**Prices from £83.94/m<sup>2</sup> | P30**

## CLASSIC NATURALS

The beauty of slow grown European oak. 10mm, 15mm and 20mm engineered construction with a 3mm, 4mm or 6mm wear layer.

**Prices from £47.94/m<sup>2</sup> | P48**

## CREATE<sup>®</sup>

Mix and match ten tones and four formats. 15mm 100% hardwood with a 4mm wear layer.

**Prices from £75.54/m<sup>2</sup> | P20**

## CRAFTED TEXTURES

Textured surfaces for a subtle reclaimed appearance. 15mm and 20mm oak planks with 4mm or 6mm wear layer.

**Prices from £59.94/m<sup>2</sup> | P34**

## WOODWORKS BY TED TODD

A selection of our antique, reclaimed and new wood floors, handmade in our Cheshire workshop.

**P56**

# OUR PARTNERS & DESIGN CENTRES

Coordinating the different elements of your project takes time and effort. Our Design Centres and partner showrooms can make that process a lot easier, and ensure you choose a wood floor that works with all the other materials, colours, textures and patterns in your scheme.

**When visiting one of our Design Centres, remember to take along the following, which will help our staff match your space to the right floor:**

- Dimensions of the room/s.
- Photos and/or plans of the space.
- Details of furniture and fittings including fireplaces.
- Samples of other materials e.g. marble tops.
- Paint samples.
- Fabric swatches.

Details of your nearest showroom and Ted Todd partners can be found at [www.tedtodd.co.uk](http://www.tedtodd.co.uk)

# HOW TO BUY

MAKE YOUR FLOOR A REALITY

Fleece, Warehouse

## 1 EASY TO CHOOSE

Order samples online, visit our Cheshire or London Design Centres or go to your local showroom or retail partner.

## 2 EXPERTLY INSTALLED

Our experienced Ted Todd Partners can supply and fit your floor. Visit the location map on our website to find your closest one.

## 3 SIMPLE TO MAINTAIN

Keep your floor looking as good as when it was first installed by using our easy to use Care Systems. You can buy Ted Todd care products from your local retailer.

# ASSESSING WOOD FLOOR SAMPLES

You'll likely consider a number of different wood floor samples before you make a final choice. As well as tone, make sure that you take the following factors into consideration so that you get the right floor for your space and the best value for money.

## WEAR LAYER

The wear layer is a great indicator of quality in engineered boards – the thicker the wear layer, the more times you can re-sand. All of our engineered boards have a wear layer of 3-6mm.

## DEPTH

We offer floors with a minimum 8mm up to 25mm thickness. 20mm engineered floors deliver a quality product that out-perform traditional solid wood floors and last longer than 13mm and 15mm floors. Make sure you compare like-for-like prices to save replacement costs.

## WIDTH

Samples are often too small to assess the width of the board, so make sure you're familiar with the width and price of the floors you're considering. Wider boards give a more expansive look, especially in larger spaces, but tend to be more expensive.

## GRADE

There are four grades of wood: Prime, Select, Nature and Rustic grade. Make sure you compare like-for-like in order to get the best value for money. There are significant differences between different grades which could ultimately affect the look of your project.

### Prime Grade

Clean uniform appearance with minimal knots, sap and colour variation.

### Select Grade

Presents natural characteristics with some knots and minor colour variation.

### Nature Grade

Broad range of natural characteristics.

### Rustic Grade

(often known as Character or Barn grade) for a rough and casual look. In short, the lower you go in terms of grade, the more rustic finish the wood has.

## UNDERFLOOR HEATING

Some floors, especially solid wood floors, are not suitable to use with underfloor heating systems. All Ted Todd and Woodworks engineered floors are suitable for installation over underfloor heating. Always consult your heating engineer before installation.

## FINISH

All pre-finished Ted Todd floors are fully finished. Beware of hidden costs of floors requiring additional on-site finishing.

## FSC™

Always check whether the product you are purchasing is FSC™ certified. Companies can be FSC™ certified whilst still selling non-certified products or applying a surcharge for FSC™ products.

# SUSTAINABILITY AT NO EXTRA COST

We are the market leaders in appreciating the importance of sustainable sourcing and won't do business with any supplier who can't prove the origin of their timber. The vast majority of our new wood floors are FSC™ or PEFC certified products - we've been FSC™ compliant since 1997, long before it was a mainstream issue.

Most companies charge extra for this certification, whereas we include this as a given at no extra cost because we believe it is the right thing to do.

# PROJECT

At Ted Todd even our wood floor essentials have a distinctively premium look

# FLOOR CARE

1

## CARE SYSTEM 1

For floors with lacquer, UV oil and hardened oil finishes we have designed a simple system to care for your floor. Clean with Easy Clean, protect with Maintenance Polish and restore with Intensive Polish.

### Care system 1 kit contains:

- 1 x 1ltr. Floor Care Easy Clean
- 1 x 1ltr. Floor Care Polish
- 1 x maintenance mop head with high quality microfibre mop pad
- 1 x pack of protective pads
- Maintenance instructions included.

2

## CARE SYSTEM 2

For natural oil, hardwax oil and restoration oil finishes we have designed a simple system to care for your floor. Clean with Soft Clean, deep clean with Intensive Clean and restore with Oil Replenish.

### Care system 2 kit contains:

- 1 x 1ltr Soft Clean
- 1 x 1ltr Intensive Clean
- 1 x maintenance mop head with high quality microfibre mop pad
- 1 x pack of protective pads
- Maintenance instructions included.

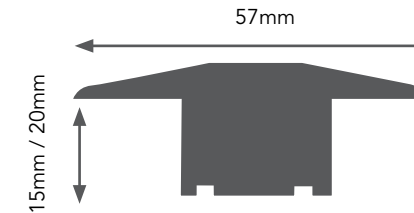

You can purchase cleaning systems from your nearest Ted Todd partner.

# ARCHITECTURAL DETAILS

As well as standard tones, these profiles can be hand finished to complement your floor. Speak to your nearest partner for more details.

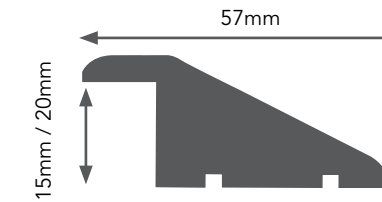

## COLOUR MATCH YOUR PROFILES

For the perfect finishing touch we recommend using our fully comprehensive range of profiles and stair treads which have been designed to accompany the floors within this brochure, all of which can be hand finished to complement your floor and stairs.

### T-DOOR SECTION 15MM & 20MM

Supplied for 15mm and 20mm thick floors, it is used to make the transition at doorways and between interior rooms from one hard surface floor to another at equal heights.

### REDUCER DOOR SECTION 15MM & 20MM

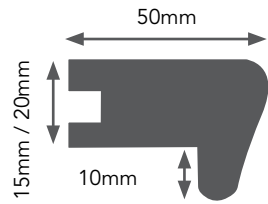

Supplied for 15mm and 20mm thick floors and used to make transitions in thickness from wood floor down to thinner surface, generally through door openings.

### L-SECTION 15MM & 20MM

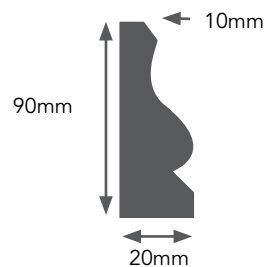

Supplied for 15mm and 20mm thick floors, and used to cover expansion spaces in perimeter areas such as brick walls and hearths as well as floor to ceiling glass and sliding doors. May also be used against existing door thresholds.

## BULL NOSING 15MM & 20MM

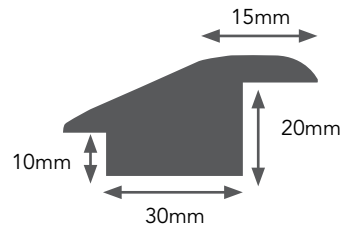

Supplied in 15mm and 20mm, this profile is used to create a finished edge on a top step, around a stairwell or a sunken living room.

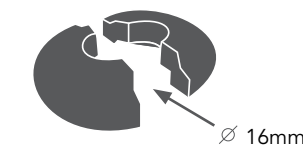

## DOOR ARCHITRAVE

## INSET STRIP

## WOOD TO CARPET SECTION REDUCING THRESHOLD 19X19MM

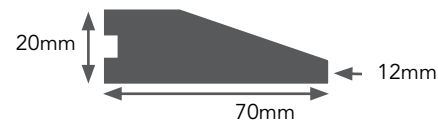

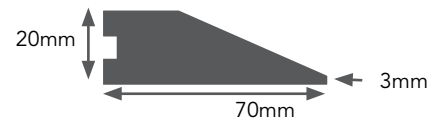

## PIPE FERRULES 16MM

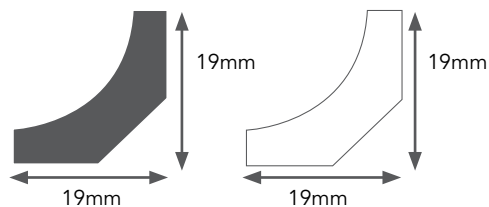

16mm internal diameter pipe cover used to conceal expansion space created around radiator pipes.

## OAK COVER STRIP

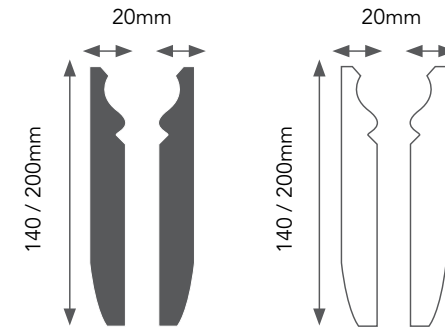

## DIMINISHING STRIP

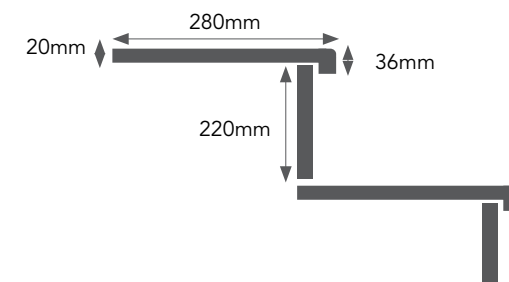

## SCOTIA

19mm x 19mm profile, used to cover expansion spaces where skirting is in place and not being removed prior to installation of flooring.

## SKIRTING BOARD

Supplied at 20mm thick, used to create a decorative border around your room, separating your floor from your walls.

## STAIR TREAD & RISER SET

Cladding for existing stairs to complement our 20mm floors with an integrated solid oak nosing for an almost seamless appearance. Finished to order to complement your floor and trimmed to size during installation.

### Pre-finished to order

With integrated nosing and pre-finished to order for the best possible complementary match to your floor.

## IN-FLOOR TEMPERATURE & HUMIDITY MEASURING

## FIDBOX

### What is Fidbox?

A Fidbox is a battery powered temperature and humidity measuring device that is fitted beneath a wood floor. The Fidbox is fitted by the installer, and is then monitored through an app on a smart phone.

Fidboxes can be particularly useful with underfloor heating to monitor heat and humidity levels, as extreme temperatures can affect the quality and structure of the wood. The Fidbox records all these factors and allows you to avoid future problems. Every 8 minutes, the Fidbox sends live readings of the heat and humidity levels to the app, letting you see the results in a visual, coloured scale.

### How much floor does it cover?

You need approximately 1 Fidbox per 50sqm.

### Ted Todd Guarantee

For the Ted Todd guarantee to be valid, the Ted Todd Fidbox system must be used for any installations with underfloor heating.

Year Guarantee  
15mm Floors

**25**  
Year Guarantee  
20mm Floors

## ENGINEERED

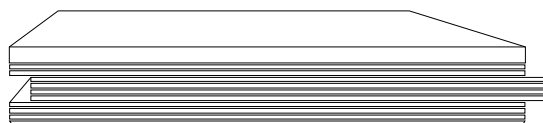

Our engineered floors are made from layered sections of solid wood. Each layer runs in a different direction to ensure durability and stability, reducing the wood's natural tendency to expand and contract. This makes it the perfect choice for underfloor heating, older homes and rooms below ground level. The top layer of an engineered board is known as the wear layer and ranges from 3mm to 6mm. Wood floors can be sanded and resealed and so the thicker the wear layer, the more often you can do this over the years.

### 2 PLY 15MM

3mm/4mm hardwood wear layer  
Bonded to 100% Birch plywood.  
Weight: 10kg/m<sup>2</sup>

**Warehouse Herringbone & Chevron, Classic Tones, Project, Classic Naturals, Crafted Textures, Specialist Woods**

# VISIT US ACROSS THE UK

## **Ted Todd Showrooms**

We have over 60 showrooms across the UK where you can browse many of our floors on a large scale. Our showroom partners can provide you with a full supply and fit package, along with all the expert advice you need to choose your floor.

## **Our Partners**

We work with partners throughout the country who can supply and fit your Ted Todd floor.

Details of your nearest showroom and Ted Todd partner can be found at [www.tedtodd.co.uk](http://www.tedtodd.co.uk).

## **Visit a Ted Todd Design Centre**

Browse our floors on a large scale at our Design Centres:

### **Cheshire Design Centre**

18 Chesford Grange,  
Woolston, Warrington  
Cheshire, WA1 4RQ
