SUPERWIDE

A WOODWORKS COLLECTION

Statement floors

Slow cured

Wide planks up to 400mm

Extra-long lengths

Oversized herringbone

High durability

WIDE PLANK INNOVATORS

Woodworks by Ted Todd have been
pioneering wide planks since 1993.

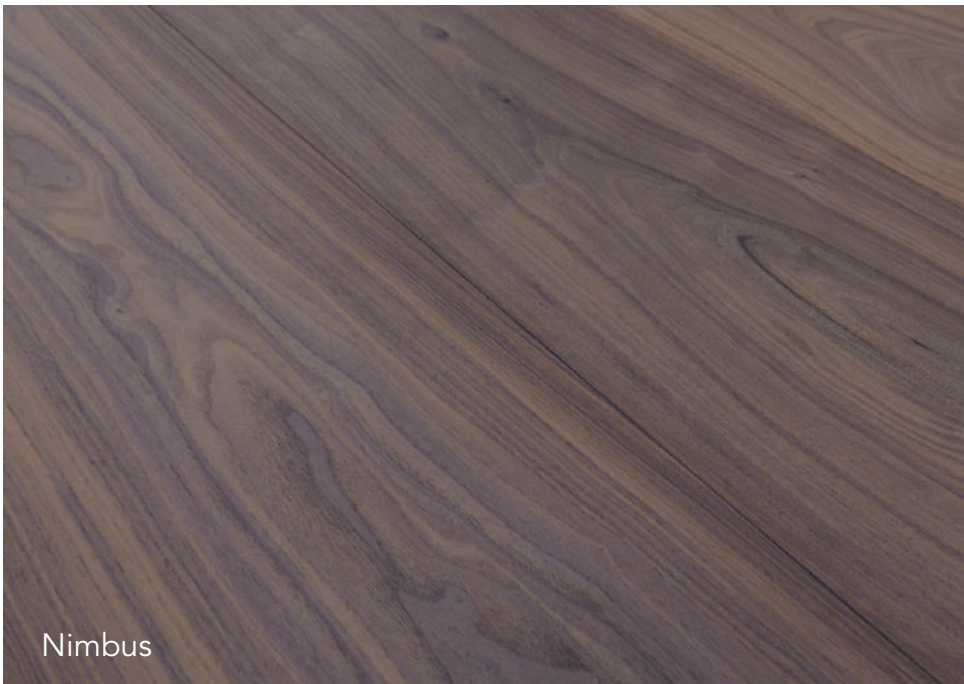

NEW SUPERWIDE WALNUT

New to our Superwide collection this winter is our new Walnut floor, Nimbus.

Grown in the Northern and Eastern regions of the USA, this wood experiences bright sunshine and harsh winters. The natural weathering contributes to the texture and grain pattern differences within the wood.

We've engineered this Walnut into 300mm wide planks in our Cheshire workshops, with long lengths available too. The boards are finished with a Naked Skin Lacquer for a matt, natural feel.

Order a free sample of our Superwide Walnut by calling 01925 284 495

Nimbus

Sable

SUPERWIDE OAK

Available in wide plank and oversized herringbone, our Superwide collection features seven different tones of European Oak, from soft whites to deep blacks.

All these floors are 2-ply engineered, 20mm thick and host a large 6mm wear layer for maximum durability throughout the years.

Sand

SUPERWIDE DOUGLAS FIR

Capturing the timeless simplicity of sustainably sourced Douglas Fir.

Egret's distinctive appearance is achieved thanks to heavily brushing these Nature Grade sap-free boards in our English workshops.

In 300mm super wide boards that are up to 3m long, Egret is a 20mm engineered standout with a natural grain pattern running throughout the planks.

Egret, Douglas Fir, as featured on cover page

UPPING THE GRADE

This year we took the decision to provide a higher grade as standard in all our Superwide floors.

We found that people were looking for a cleaner, fresher look with less character and natural variation, so we now offer a Select Grade option for these floors. The Select grading for these floors strikes a great balance between the calmness of Prime Grade and the natural character of Nature Grade.

The overall effect are boards that are very calm but have a lovely amount of gentle colour variation and small knots. This grade also eliminates most of the sap, which is light fresh-grown material that gives too much contrast in these floors.

If you do prefer a more characterful floor, a Nature Grade option is available and comes at a lower price point.

NATURALLY SLOW CURED

Every stage of a Superwide floor is naturally slow cured.

Coats are applied a number of times (depending on the complexity of the floor) and each application is air dried over a number of days before the next application begins. This gives each finish time to naturally harden as it reacts with the oxygen in the air.

As these layers of finish build up, we create floors that feel very natural and are also incredibly durable.

NEW SAMPLE BOXES

Our new sample boxes are available now and can be tailor-made to match your project specifications.
