BOLD, MINAMLIST AND CONTEMPORARY, THE DESIGN OF THIS UNIQUE RESTAURANT SUCCESSFULLY ALIGNS TWO CULTURES AND DELIVERS STRONG BRAND IDENTITY THROUGH THE SCHEMES MATERIAL CHOICES

PROJECT OVERVIEW

Award-winning RIBA Chartered architecture practice FAB Architects were selected to help deliver the unusual Tokyo Pizza concept. Based in a subterranean environment the brief was to create a modern and functional space with lots of atmosphere that fused together two cultures.

HOW WE HELPED

Having decided on the concept for the space FAB contacted our Leisure specification consultant who took on board the projects commercial requirements and presented wood options that would deliver everything required of a high traffic area floor and would achieve the design and style elements set out by the clients.

OUTCOME

This bold interior uses the dark Woodworks herringbone floor to seamlessly bring different areas of the restaurant together and wooden slats and shou sugi ban textured walls deliver a raw but welcoming environment.

Not only does this tactile space successfully combine two cultures, with Tokyo vibes and nods to contemporary Japanese culture, it also takes customers on an exploration of the brands' identity when they visit.

FEATURED FLOOR

EBONY HERRINGBONE SUPERWIDE COLLECTION

European Nature Grade Oak Herringbone

Brushed & Burnished Hardwax Oiled

W:200mm | D:20mm | L:600m

2ply Engineered

Slip rating: Low risk dry. Moderate risk wet.

Available in:

OUR CERTIFICATIONS EXPLAINED

We go above and beyond the usual environmental and sustainability standards, and have many third party accreditations.

In short, all of our timber (whether floors or wall cladding) follow the UK Timber Regulations as standard, which verifies that all of our timber is legally harvested.

All of our floors are also SVOC free and have low VOC emissions. SVOCs are pollutants at the molecular level which are emitted from synthetic man-made materials such as LVT, vinyl and plastics.

Talk to our team today about using sustainable wood flooring in your project.

COLLECTION	CERTIFICATION						
	 A global organisation that guarantees that felled timber is sustainably sourced	 A global organisation that guarantees that felled timber is sustainably sourced	GENUINE RECLAIMED SOURCED Genuine reclaimed wood re-used from reclamation sites	GENUINE ANTIQUE SOURCED Genuine antique wood upwards of 100 years old	UKTR UK regulations that confirm timber is legally harvested	 All of our floors are free from semi-volatile organic compounds	 All of our floors have very low levels of volatile organic compounds
