RECLAIMED

BECAUSE LIVING WITH
SPECIAL WOODS MATTERS

DEEP ROOTED SOUL

As modern pilgrims of reclaimed timbers, we know that woods with this inherent soul, beauty and feeling don't come around too often.

Whatever their heritage may be, these woods have an elegance which makes time stand still.

The next chapter in their story is up to you...

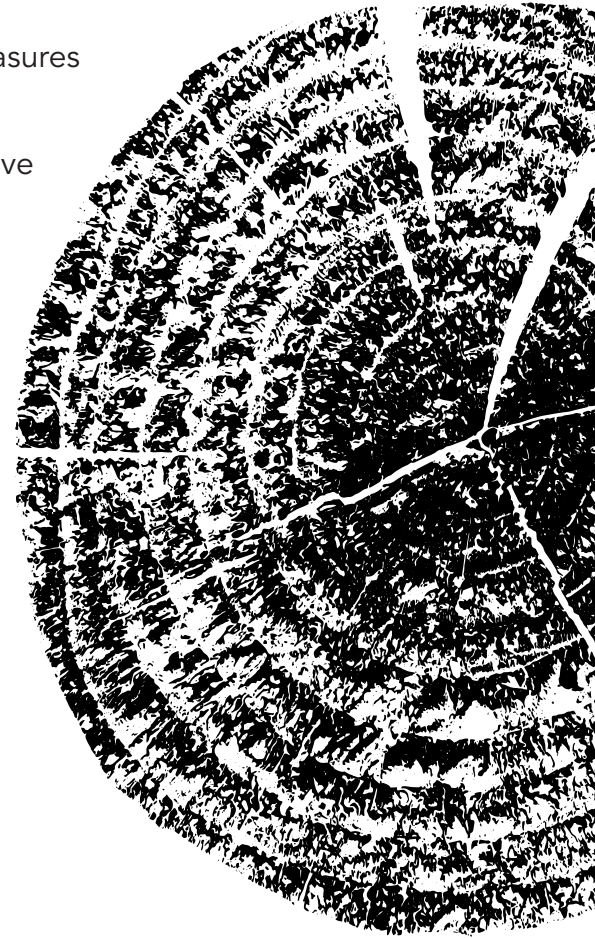

Ruskin Parquet de Versailles, Antique

MONUMENTAL DISCOVERIES

We are the custodians of treasures tracing the entire globe.

These woods can have massive proportions, enchanting growth rings, historical grain patterns, perfect imperfections and elemental patinas that tell tales of a previous life.

UNEARTHED.

THE 100 YEAR FLOOR

Reclaimed wood has an important role to play in the circular economy. No other natural flooring material can be reworked in this way, which is why our passion blooms with old wood.

Be it reclaimed now or reclaimed in the future, your floor can be used for 100 years or more, meaning less manufacturing, less wastage and an overall happier, healthier planet.

"From an architectural point of view the most tangible thing we can do to be sustainable is look seriously at reuse."

Eddie Heathcote,
Architecture and
Design Critic for
the Financial Times
