A TRIUMPH IN RENOVATION, THIS TRADITIONAL VICTORIAN TERRACED HOUSE CREATES A SEAMLESS JUXTAPOSITION BETWEEN OLD AND NEW THAT DELIVERS TRADITIONAL AESTHETICS WITH A MODERN EDGE FOR A YOUNG FAMILY WITH A CLEAR VISION.

PROJECT OVERVIEW

Freehaus, an architects practice who through their sensitive design-led work hone interests in sustainability and conservation, were recently appointed to renovate and extend this traditional Victorian terraced house. Located in the London borough of Hackney, the property is home to a young family who had modern wrap-around extension which sits comfortably at the rear of the property. For this area of the project a new wood floor was required.

HOW WE HELPED

Our commercial specification team were approached directly by the project's main contractor Magnibuild. With a product in mind and quantity required, we were able to deliver the chosen floor next day as most Ted Todd floors are held in stock in our warehouses in Cheshire.

OUTCOME

The look of the extension and interior fixtures and fittings are indeed modern, but the extension is a character-filled addition to the existing fabric of a traditional property, which is soulfully enhanced further by the natural herringbone flooring.

By adopting a collaborative approach making use of the existing architecture, Freehaus have delivered a functional and modern home that respects the integrity of a Victorian property whilst fully meeting their clients' individual requirements and distinct vision.

SANTI HERRINGBONE STRADA COLLECTION

European Oak, Nature,
Brushed, Double Satin Lacquer
W:100mm | **D:**20mm | **L:**500mm
2ply Engineered
Slip rating: Low risk dry. Low risk wet.

OUR CERTIFICATIONS EXPLAINED

We go above and beyond the usual environmental and sustainability standards, and have many third party accreditations.

In short, all of our timber (whether floors or wall cladding) follow the UK Timber Regulations as standard, which verifies that all of our timber is legally harvested.

All of our floors are also SVOC free and have low VOC emissions. SVOCs are pollutants at the molecular level which are emitted from synthetic man-made materials such as LVT, vinyl and plastics.

Talk to our team today about using sustainable wood flooring in your project.

COLLECTION	CERTIFICATION				
	 A global organisation that guarantees that felled timber is sustainably sourced	 A global organisation that guarantees that felled timber is sustainably sourced	UKTR UK regulations that confirm timber is legally harvested	 All of our floors are free from semi-volatile organic compounds	 All of our floors have very low levels of volatile organic compounds
